Flow Diagram for testing returnees for COVID-19 (RDT or PCR)

Returnee
(either in 'home quarantine' or at 'quarantine center')

*For individual who has returned from outside to Nepal **at 14 days***

Test

Negative

Continue home quarantine for 21 days

If symptom develops, go to hospital/health care facility

Positive

Isolate and send to hospital for treatment

Continue treatment Protocol and sample collection during discharge

Start Contact Tracing of the confirmed case

Note: If the test was done by RDT- Repeat test by PCR only for positive cases

(Also) If test Negative but symptoms persisting: RT-PCR If -ve, PCR Test for 10% cases Randomly.
